PROFESSIONAL SUMMARY

Information Systems student at President University and Data Analyst Intern at Badan Geologi, Ministry of Energy and Mineral Resources. Experienced in turning raw data into clear insights through data cleaning, analysis, and dashboards, and in building web and mobile applications that solve real operational problems. Comfortable working across Excel, SQL, Python, Power BI, JavaScript, and React, and quick to learn new tools. Detail-oriented, independent, and enjoys collaborating with others to deliver practical solutions.

EXPERIENCE

Data Analyst Intern | BKAT (Balai Konservasi Air Tanah) Aug 2026 - Present

Badan Geologi, Ministry of Energy and Mineral Resources (ESDM)

- Independently designed and built a web-based analytics dashboard with React and Node.js that consolidates 6 operational spreadsheets from 3 sub-divisions into a single reporting platform.
- Automated real-time reporting by connecting Google Sheets through the Google Sheets API and Server-Sent Events, replacing manual spreadsheet checks with a live dashboard.
- Cleaned and standardized raw spreadsheet data, fixing merged headers, invalid date formats, and missing values to produce consistent, analysis-ready datasets.
- Delivered dedicated views for each sub-division: minimum service standards and electricity expenses for General Affairs, groundwater well monitoring for Conservation, and correspondence and supervision activities for Groundwater Utilization.
- Gathered reporting needs from each sub-division and reported progress directly to the Head of Division.

EDUCATION

Bachelor of Information Systems | President University, Cikarang Sep 2024 - 2027 (Expected)

GPA: 3.63 / 4.00

Relevant Coursework: Data Science Programming, Data Visualization, Machine Learning, Database Systems, Generative AI for Data Science, Object-Oriented Programming, Mobile Programming, Web Design

PROJECTS

Retail Sales Data Integration & Analysis | *Personal Project* Sep 2026

- Cleaned, integrated, and validated 402 sales records from store POS and online marketplace sources in Excel, resolving 8 data quality issues including duplicates, inconsistent formats, and missing or negative values.
- Reconciled row counts and revenue totals (Quantity × Unit Price) across sources and documented every issue, action, and assumption in a data quality log.
- Analyzed revenue by channel, product, category, and month, finding that 2 products generated 54% of total revenue and 16% of store revenue came from unidentified customers.
- Built an interactive Power BI dashboard with DAX measures, a Pareto chart, and slicers, and recommended stock prioritization, a cross-channel membership ID, and bundling promotions.

Fleet Space Optimizer | *Academic Project* Jul 2026 - Sep 2026

- Built a web-based logistics tool that recommends which trucks to use and how to arrange shipment items, using a 3D bin packing engine written in JavaScript.
- Implemented item rotation, weight-capacity validation, a 70% support-ratio rule, and comparison of 4 packing strategies to select the best fill rate.
- Added multi-truck optimization, CSV manifest upload, custom fleet management, and an interactive 3D loading view with Three.js, plus cost and trip-savings estimates.
- Prototyped the packing logic in Python with py3dbp to compare truck types and estimate fill rate.

DVD Rental Interactive Dashboard with AI Assistant | *Academic Project*

Apr 2026 - May 2026

- Built a full-stack analytics dashboard with a FastAPI (Python) backend and an HTML, CSS, and JavaScript frontend, using Plotly to visualize film popularity, actors, customers, and revenue.
- Wrote SQL queries (multi-table joins, aggregations, CTEs) on a PostgreSQL database through SQLAlchemy and pandas to calculate KPIs, monthly rental trends per store, and revenue by genre.
- Developed a demand forecasting feature that predicts next-month rentals per film by combining a linear trend with weighted recent averages, then ranks films by opportunity score with a recommended action.
- Integrated a floating AI chat powered by the DeepSeek LLM that answers data questions, renders charts on demand, filters by genre, switches between 5 themes, and declines out-of-scope requests.

Financial Manager App | *Personal Project*

Nov 2025 - Dec 2025

- Developed a personal finance mobile app with Flutter and a Supabase backend, featuring expense tracking, OCR receipt scanning, and budgeting.
- Built spending analytics and smart reminder features to help users stay on track with their financial goals.

Trash to Treasure | *Team Project*

Jun 2025 - Jul 2025

- Led a team to build a web-based recycling marketplace where users upload reusable items so others can buy or claim them instead of throwing them away.
- Built the frontend with HTML, CSS, and JavaScript and used Supabase for authentication, a PostgreSQL database, and image storage.
- Implemented user registration and login, item upload with photos, marketplace browsing and purchase, transaction status tracking, and a reward system where users earn and spend recycling points.

COMMITTEE EXPERIENCE

Logistics Member | Tech Sprint 3in1

Feb 2026 - Jun 2026

- Coordinated with each division to identify and provide the equipment and supplies they needed for the event.
- Prepared and set up the venue before and on the event day to ensure activities ran smoothly.

SKILLS

Data & Analytics: Excel (PivotTables, PivotCharts, Advanced Functions, Data Cleaning), SQL, PostgreSQL, Python, pandas, Power BI, DAX, Data Visualization, Machine Learning

Web & Mobile Development: HTML, CSS, JavaScript, React, Node.js, FastAPI, Plotly, Three.js, Google Sheets API, Flutter, Dart, Supabase

Tools: Git, GitHub, Google Sheets, Microsoft Office

Languages: Indonesian (Native), English (Conversational)

Soft Skills: Communication, Problem Solving, Analytical Thinking, Attention to Detail, Teamwork & Collaboration, Leadership, Fast Learner, Time Management, Adaptability

CERTIFICATES

- Data Analysis: Fullstack Intensive Bootcamp — MySkill
- Scientific Computing with Python — freeCodeCamp
- JavaScript Certification — freeCodeCamp
- Responsive Web Design — freeCodeCamp
