PROFESSIONAL SUMMARY

Information Systems student and current Data Analyst Intern with hands-on experience in data retrieval, cleaning, and validation using SQL, Python, and Excel. Experienced in integrating data from multiple sources, building dashboards in Power BI, and preparing reports that turn raw data into clear business insights.

EXPERIENCE

Data Analyst Intern | BKAT (Balai Konservasi Air Tanah) Aug 2026 - Present
Badan Geologi, Kementerian Energi dan Sumber Daya Mineral (ESDM)

Badan Geologi, Ministry of Energy and Mineral Resources (ESDM) – groundwater conservation unit for the Jakarta Groundwater Basin.

- Independently built a web-based analytics dashboard using React and Node.js that consolidates 6 operational spreadsheets from 3 sub-divisions into a single reporting platform.
- Cleaned and standardized raw spreadsheet data into consistent, analysis-ready datasets.
- Automated real-time reporting by connecting Google Sheets through the Google Sheets API and Server-Sent Events, replacing manual spreadsheet checks with a live dashboard.
- Delivered division-specific reports covering minimum service standards (SPM), electricity expenses, groundwater well monitoring, and correspondence and supervision activities, reporting directly to the Head of Division.

EDUCATION

Bachelor of Information Systems | President University
GPA: 3.59 / 4.00 Sep 2024 - Present
Relevant Coursework: Data Science Programming, Data Visualization, Machine Learning, Database Systems, Generative AI for Data Science, Object-Oriented Programming, Mobile Programming, Web Design

PROJECTS

BKAT Multi-Division Analytics Dashboard | Developer | Internship Project Aug 2026 - Present

- Built and maintained data-cleaning pipelines to transform raw, inconsistent spreadsheet data (merged headers, invalid date formats, missing values) from 3 divisions into standardized, analysis-ready datasets.
- Automated real-time reporting by integrating Google Sheets as a live data source via API + SSE sync, eliminating manual data pulls for 3 divisions.
- Visualized multi-division datasets into role-specific dashboards to support faster, data-driven decision-making.

- Cleaned, integrated, and validated 402 sales records from POS and online marketplace sources in Excel, reconciling row counts and revenue totals (Quantity × Unit Price) across sources and resolving 8 data quality issues.
- Analyzed revenue drivers across channel, product, category, and month, revealing that 2 products generated 54% of total revenue.
- Built an interactive Power BI dashboard with DAX measures and slicers to present channel, product, and monthly trends, supporting recommendations on stock prioritization and channel strategy.
- Documented a data quality log covering issues, actions, assumptions, and before/after results to ensure a traceable, audit-ready dataset.

DVD Rental Dashboard | Developer | *Academic Project***2026 - Present**

- Wrote SQL queries (joins, aggregations) on a PostgreSQL database to retrieve and analyze rental, customer, and revenue data.
 - Built an interactive analytics dashboard in Python using Streamlit to visualize rental trends, customer behavior, and revenue performance.
 - Integrated an AI assistant that answers user questions and generates data-driven insights from the database.
-

SKILLS

Technical: Python, Streamlit, SQL, PostgreSQL, Excel (Pivot Table, Pivot Chart, Advanced Function, Data Cleaning), Data Analytics, Data Visualization, Machine Learning, Power BI, HTML, CSS, JavaScript, GitHub

Soft Skills: Communication, Problem Solving, Analytical Thinking, Attention to Detail, Teamwork & Collaboration, Fast Learner, Time Management, Adaptability

CERTIFICATES

- Data Analysis: Fullstack Intensive Bootcamp — MySkill
- Scientific Computing with Python — freeCodeCamp
- JavaScript Certification — freeCodeCamp
- Responsive Web Design — freeCodeCamp
