PROFESSIONAL SUMMARY

Information Systems student with a strong interest in Data Analytics and data-driven problem solving. Skilled in building dashboards, analyzing data, and developing data-driven applications through academic and personal projects. Seeking a Data Analyst internship to apply analytical and technical skills to real-world business problems.

SKILLS

Technical: Python, SQL, PostgreSQL, Excel, Data Analytics, Data Visualization, Machine Learning, Flutter, Dart, HTML, CSS, JavaScript
Soft Skills: Communication, Problem Solving, Collaboration

EDUCATION

Bachelor of Information Systems | President University Sep 2024 - Present
GPA: 3.59 / 4.00
Relevant Coursework: Data Science Programming, Data Visualization, Machine Learning, Database Systems, Information System Analysis & Design, Generative AI for Data Science, Object-Oriented Programming, Mobile Programming

EXPERIENCE

Logistics Volunteer | *Tech Sprint 3in1 (Hackathon Event)* Jun 2026

- Supported logistics operations for a hackathon event, coordinating equipment, venue setup, and participant needs.
- Collaborated with the team to ensure smooth event flow and timely resolution of on-site issues.

Logistics Volunteer | *PURD (Farewell & Roblox Exhibition)* Apr 2026

- Managed logistics for a farewell event and Roblox exhibition, handling setup, supplies, and event coordination.
- Worked closely with team members to support participants and maintain event schedules.

PROJECTS

DVD Rental Dashboard | Developer | *Personal Project* 2026 - Present

- Built an interactive dashboard using the DVD Rental database to analyze rentals, customers, and revenue trends.
- Integrated an AI assistant to answer user queries and generate data-driven insights.

Financial Manager App | Developer | *Personal Project* 2025 - Present

- Developed a personal finance mobile application using Flutter and Supabase, featuring expense tracking, OCR receipt scanning, and budgeting.
- Built spending analytics and smart reminder features to support financial goal tracking.

Trash To Treasure | Group Leader | *Academic Project* 2024 - 2025

- Led a team to develop a digital waste management platform connecting users with recycling services through waste tracking and reward points.
- Designed a marketplace feature for recycled products to support the circular economy.

CERTIFICATES

- Data Analysis: Fullstack Intensive Bootcamp — MySkill
- Scientific Computing with Python — freeCodeCamp
- JavaScript Certification — freeCodeCamp
- Responsive Web Design — freeCodeCamp
